

Justice

Justice is a well-known word,
that everybody has once heard.

In our world everything revolves around this,
because it's a privilege that no one wants to miss!
It's the opportunity to get treated equally then and now,
that's what everyone should know.

Otherwise it would be a disgrace,
in every single place.

For centuries now people demand for the final settlement,
to put this issue to an end.

They're saying, that it's going for too long,
to prove the others wrong.

Everybody needs to get a chance,
especially in advance!

Because it's not a question of money,
sweet little honey.

And it's not a question of shrinking rights
for what people fights.

Because it's like a beautiful flower,
which ensures our needed power.

But unfortunately nothing can take for granted anymore,
simply because many like to ignore,
when others cannot smile,
because they've dealt with injustice for a while.

So it will remain this fact,
at least if one day someone decides to act!
